

Current TVET Data and Related Statistics 2005-2009

Technical Education and Skills Development Authority
 Planning Office
 March 2010

FOREWORD

Informed decisions are based on reliable and accurate facts and statistics. Thus, the generation of timely and accurate TVET statistics and other relevant data is important.

This compendium of TVET and related statistics is a handy reference for TVET policymakers and stakeholders. It delves not only on TVET statistics but also related information on basic and tertiary education. Moreover, it also includes statistics related to labor and employment and economic indicators. As much as possible, statistics are shown in series to reflect trends over time.

It is our hope that this publication will be useful and beneficial to all stakeholders.

^P - Preliminary data as of February 5, 2010

** Normalized with 2007 and previous years' output

Note:

1. In certain years, graduates exceed enrolment due to spill-over from previous year enrolment graduating to the next year.
2. The difference between enrolment and graduates for institution-based does not necessarily indicate drop-outs. In some cases in the previous years, there were institutions still offering TVET programs under No Training Regulations (NTR) with one (1), two (2) or three (3) year training duration.
3. Data for 2009 is preliminary.
