> 122nd TESDA BOARD MEETING 11 August 2020, Tuesday, 9:00 a.m. Teleconference Via Zoom Platform

> > Resolution No. 2020 - 33 (Page 1 of 4 pages)

APPROVING AND PROMULGATING THE TRAINING REGULATIONS FOR AUTOMOTIVE SERVICING (CHASSIS REPAIR) NC II

WHEREAS, TESDA Board Resolution No. 2013-11 was issued "Approving and Promulgating the Amendments of the Training Regulations for Automotive Servicing NCI, Automotive Servicing NC II, Automotive Servicing NC III and Automotive Servicing NC IV" last 17 December 2013 during the 87th TESDA Board Meeting;

WHEREAS, it is the policy of TESDA to review after three (3) years any Training Regulations (TRs) promulgated by the TESDA Board;

WHEREAS, there is a need to review the existing Training Regulations in view of the developments in technology and current trends and practices in the industry;

WHEREAS, the Chamber of Automotive Manufacturers of the Philippines, Inc. (CAMPI) with the assistance of Qualifications and Standards Office (QSO) of TESDA have reviewed the existing Training Regulations in Automotive Servicing NC II to response to the current skills requirements of the industry with its new technologies and industry manpower set-up and recommended amendments;

WHEREAS, industry experts and partners, headed by the President of the Chamber of Automotive Manufacturers of the Philippines, Inc. (CAMPI), with the technical assistance of the Qualifications and Standards Office (QSO) of TESDA endorsed the proposed revisions of the Training Regulations. The existing Training Regulations shall be replaced with three (3) different Training Regulations, based on the current skills requirements of the industry with its new technologies and industry manpower set-up;

WHEREAS, during the 125th Standards-Setting and Systems Development (SSSD) Committee Meeting held on 03 August 2020, the Committee deliberated upon and agreed to favorably recommend the approval and promulgation of the Training Regulations for Automotive Servicing (Chassis Repair) NC II as attached in Annex "A" and made an integral part of this Resolution;

APPROVING AND PROMULGATING THE TRAINING REGULATIONS FOR AUTOMOTIVE SERVICING (CHASSIS REPAIR) NC II

WHEREAS, during the 122nd TESDA Board Meeting on 11 August 2020, the TESDA Board deliberated and considered the proposed Training Regulations for Automotive Servicing (Chassis Repair) NC II;

NOW, THEREFORE, BE IT RESOLVED AS IT IS HEREBY RESOLVED, that the aforementioned Automotive Servicing (Chassis Repair) NC II as herein appended is hereby approved and promulgated;

BE IT RESOLVED, FINALLY, that:

(1) Copies of this Resolution and the abovementioned Training Regulations be published in the Official Gazette or in a newspaper of general circulation, and disseminated to all concerned, and the same shall be effective fifteen (15) days upon publication;

(2) All programs registered under the current Automotive Servicing NC II must comply with the requirements of the abovementioned Training Regulations. The oneyear period of re-registration under this Training Regulations shall commence on the date of effectivity as indicated in the Implementing Guidelines/ TESDA Circular for the deployment of the Training Regulations to be issued by the TESDA Secretariat; and

(3) Graduates of TVET programs covered by the aforementioned Training Regulations shall be required to undergo mandatory assessment under the national assessment and certification program.

Brake System, Repair Suspension System Repair Suspension System. It covers the basic, common and core competencies. This course is also designed to enhance the basic and common knowledge, skills and attitudes of an individual in the field of automotive servicing.	mentioned competencies to be employed. To obtain this, all units prescribed for this qualification must be achieve.
3.2 Training Delivery	
 The delivery of training should adhere to the design of the curriculum. Delivery should be guided by the 10 basic principles of competency-based TVET. The training is based on curriculum developed from the competency standards; Learning is modular in its structure; Training delivery is individualized and self-paced; Training materials are directly related to the competency standards and the curriculum modules; Assessment is based in the collection of evidence of the performance of work to the industry required standard; Training allows for multiple entry and exit; and Approved training programs are nationally accredited. The competency-based TVET system recognizes various types of delivery modes, both on and off-the-job as long as the learning is driven by the competency standards specified by the industry. The following training modalities may be adopted when designing training programs would contain both in-school and in-industry training or fieldwork components. Details can 	 The delivery of training shall adhere to the design of the curriculum. Delivery shall be guided by the principles of competency-based TVET. Course design is based on competency standards set by the industry or recognized industry sector; (Learning system is driven by competencies written to industry standards) Training delivery is learner-centered and should accommodate individualized and self-paced learning strategies; Training can be done on an actual workplace setting, simulation of a workplace and/or through adoption of modern technology. Assessment is based in the collection of evidence of the performance of work to the industry required standards; Assessment of competency takes the trainee's knowledge and attitude into account but requires evidence of actual performance of the competency as the primary source of evidence. Training program allows for recognition of prior learning (RPL) or current competencies; Training completion is based on satisfactory performance of all specified competencies. The competency-based TVET system recognizes various types of delivery modes, both on-and off-the-job as long as the learning is driven by the competency standards specified by the industry. The following training modalities and their variations/components may be adopted singly or in combination with other

be referred to the Dual Training System (DTS) Implementing Rules and Regulations.	modalities when designing and delivering training programs:
 Modular/self-paced learning is a competency- based training modality wherein the trainee is allowed to progress at his own pace. The 	2.1 School/Institution- Based:
 Peer teaching/mentoring is a training modality wherein fast learners are given the opportunity to assist the slow learners. Supervised industry training or on-the-job training is an approach in training designed to enhance the knowledge and skills of the trainee through actual experience in the 	 Dual Training System (DTS)/Dualized Training Program (DTP) which contain both in-school and in-industry training or fieldwork components. Details can be referred to the Implementing Rules and Regulations of the DTS Law and the TESDA Guidelines on the DTP;
 workplace to acquire specific competencies prescribed in the training regulations. Distance learning is a formal education process in which majority of the instruction occurs when the students and instructor are not in the same place. Distance learning may employ correspondence study, or audio, video or computer technologies. 	 Distance learning is a formal education process in which majority of the instruction occurs when the students and instructor are not in the same place. Distance learning may employ correspondence study, audio, video, computer technologies or other modern technology that can be used to facilitate learning and formal and non-formal training. Specific guidelines on this mode shall be issued by the TESDA Secretariat.
	 Supervised Industry Training (SIT) or on-the-job training (OJT) is an approach in training designed to enhance the knowledge and skills of the trainee through actual experience in the workplace to acquire specific competencies as prescribed in the training regulations. It is imperative that the deployment of trainees in the workplace is adhered to training programs agreed by the institution and enterprise and status and progress of trainees are closely monitored by the training institutions to prevent opportunity for work exploitation.
	 The classroom-based or in-center instruction uses of learner-centered methods as well as laboratory or field- work components.

Existing Promulgated Training Regulations (Board Resolution No. 2013-11)	Amendments
	2.2 Enterprise-Based:
	• Formal Apprenticeship – Training within employment involving a contract between an apprentice and an enterprise on an approved apprenticeable occupation.
	 Informal Apprenticeship - is based on a training (and working) agreement between an apprentice and a master craftsperson wherein the agreement may be written or oral and the master craftsperson commits to training the apprentice in all the skills relevant to his or her trade over a significant period of time, usually between one and four years, while the apprentice commits to contributing productively to the work of the business. Training is integrated into the production process and apprentices learn by working alongside the experienced craftsperson.
	• Enterprise-based Training- where training is implemented within the company in accordance with the requirements of the specific company. Specific guidelines on this mode shall be issued by the TESDA Secretariat.
	2.3 Community-Based – short term program conducted by non-government organizations (NGOs), LGUs, training centers and other TVET providers which are intended to address the specific needs of a community. Such programs can be conducted in informal settings such as barangay hall, basketball courts, etc. These programs can also be mobile training program (MTP).
3.3 Trainee Entry Requirements	
Trainees or students should possess the following requirements: can communicate both oral and written; 	Trainees or students who would like to enroll in this program must possess the following requirements:
can perform basic mathematical computation.

Existing Promulgated Training Regulations (Board Resolution No. 2013-11)	Amendments
3.6 Trainer's Qualification	
AUTOMOTIVE/LAND TRANSPORT SECTOR AUTOMOTIVE SERVICING – NC II	TRAINER'S QUALIFICATIONS FOR AUTOMOTIVE SERVICING (CHASSIS REPAIR) NC II
 Holder of National TVET Trainers Certificate (NTTC) Level 1 - Automotive Servicing NC II Must be computer literate *Must have at least 2 years job/industry experience 	 NEW TRAINERS Holder of National TVET Trainers Certificate (NTTC) Level 1 in Automotive Servicing (Chassis Repair) NC II Must have at least 1-year industry experience in Automotive Servicing for the last 3 years EXISTING TRAINERS Holder of National TVET Trainers Certificate (NTTC) Level 1 in Automotive Servicing (Chassis Repair) NC II Must have industry immersion of 40 hours annually (industry training which includes structured training program inclusive of hands-on activities, observation in a workshop, and training certificates with number of hours)
3.7 Institutional Assessment	
Institutional assessment is undertaken by trainees to determine their achievement of units of competency. A certificate of achievement is issued for each unit of competency.	Institutional Assessment is gathering of evidences to determine the achievements of the requirements of the qualification to enable the trainer make judgement whether the trainee is competent or not competent.
SECTION 4. National Assessment and Certific	ation Arrangements
4.1 To attain the National Qualification of Automotive Servicing NC II, the candidate must demonstrate competence through project-type assessment covering all the units listed in Section 1. Successful candidates shall be awarded a National Certificate signed by the TESDA Director General.	Competency Assessment is the process of collecting evidence and making judgments whether competency has been achieved. The purpose of assessment is to confirm that an individual can perform to the standards expected at the workplace as expressed in relevant competency standards.
4.2 Individual aspiring to be awarded the qualification of Automotive Servicing NC II must acquire Certificates of Competency in all the following core units of the Qualification. Candidates may apply for assessment in any accredited assessment center.	The assessment process is based on evidence or information gathered to prove achievement of competencies. The process may be applied to a full qualification or employable unit(s) of competency in partial fulfillment of the requirements of the national qualification.
