The Competency Standards (CS) serves as basis for the:

1. Registration and delivery of training programs; and
2. Development of curriculum and assessment instruments.

Each CS has three sections:

- Section 1 **Definition of Competency Standards** - refers to industry-determined specification of competencies required for effective work performance which are expressed as outcomes and focus on workplace activity rather than training or personal attributes and capture the ability to apply skills in new situations and changing work organization.
- Section 2 **Competency Standards** - gives the specifications of competencies required for effective work performance.
- Section 3 **Training Arrangements** - contains information and requirements in designing training programs. It includes nominal training duration; trainee entry requirements; tools and requirements; tools and equipment; training facilities and trainer's qualification.

COMPETENCY STANDARDS LANGUAGE A2 LEVEL

Section 1 LANGUAGE A2 LEVEL

The **LANGUAGE A2 LEVEL** consists of competencies that a person must achieve in listening, speaking, reading and writing at a waystage level aligned to Common European Framework of Reference for Languages (CEFR) standards.

This level includes the competencies which the individuals must have so they can use expressions related to areas of most immediate relevance (e.g. very basic personal and family information, shopping, local geography, employment), can communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar and routine matters and can describe in simple terms aspects of his/her background, immediate environment and matters in areas of immediate need.

Upon completion of this program, the learner should be able to pass any language proficiency examination corresponding to A2 level.

The units of competency comprising this competency standards include the following:
