## ELECTRICAL INSTALLATION AND MAINTENANCE NC II

**ELECTRICAL & ELECTRONICS SECTOR**

**TECHNICAL EDUCATION AND SKILLS DEVELOPMENT AUTHORITY**  
East Service Road, South Luzon Expressway, Taguig City, Metro Manila

*Technical Education and Skills Development Act of 1994  
(Republic Act No. 7796)*

**Section 22, “Establishment and Administration of the National Trade Skills Standards” of the RA 7796 known as the TESDA Act mandates TESDA to establish national occupational skill standards. The Authority shall develop and implement a certification and accreditation program in which private industry group and trade associations are accredited to conduct approved trade tests, and the local government units to promote such trade testing activities in their respective areas in accordance with the guidelines to be set by the Authority.**

The Training Regulations (TR) serve as basis for the:

1. Competency assessment and certification;
2. Registration and delivery of training programs; and
3. Development of curriculum and assessment instruments.

Each TR has four sections:

- |           |   |
|-----------|---|
| Section 1 | Definition of Qualification - refers to the group of competencies that describes the different functions of the qualification.  |
| Section 2 | Competency Standards - gives the specifications of competencies required for effective work performance.  |
| Section 3 | Training Standards - contains information and requirements in designing training program for certain Qualification. It includes curriculum design; training delivery; trainee entry requirements; tools, equipment and materials; training facilities; trainer's qualification; and institutional assessment. |
| Section 4 | National Assessment and Certification Arrangement - describes the policies governing assessment and certification procedure   |

## TRAINING REGULATIONS FOR ELECTRICAL INSTALLATION & MAINTENANCE NC II

### SECTION 1 ELECTRICAL INSTALLATION & MAINTENANCE NC II QUALIFICATION

The Electrical Installation and Maintenance NC II Qualification consists of competencies that a person must achieve to enable him/her to install and maintain electrical wiring, lighting and related equipment and systems where the voltage does **not** exceed 600 volts in residential houses/buildings.

This Qualification is packaged from the competency map of Electrical and Electronics sector as shown in Annex A.

The Units of Competency comprising this Qualification include the following:

#### **CODE NO.      BASIC COMPETENCIES**

500311105	Participate in workplace communication
500311106	Work in a team environment
500311107	Practice career professionalism
500311108	Practice occupational health and safety procedures

#### **CODE NO.      COMMON COMPETENCIES**

ELC311205	Use Hand Tools
ELC311201	Perform Mensuration and Calculation
ELC311202	Prepare and Interpret Technical Drawing
ELC311204	Apply Quality Standards
ELC311206	Terminate and Connect Electrical Wiring and Electronic Circuits

#### **CODE NO.      CORE COMPETENCIES**

ELC741301	Perform roughing-in activities, wiring and cabling works for single-phase distribution, power, lighting and auxiliary systems
ELC741302	Install electrical protective devices for distribution, power, lighting, auxiliary, lightning protection and grounding systems
ELC741303	Install wiring devices of floor and wall mounted outlets, lighting fixtures/switches, and auxiliary outlets

**A person who has achieved this Qualification is competent to be:**

- Building-Wiring Electrician
- Residential/Commercial-Wiring Electrician
- Maintenance Electrician

## SECTION 2 COMPETENCY STANDARDS

This section gives the details of the contents of the units of competency required in ELECTRICAL INSTALLATION & MAINTENANCE NC II. These units of competency are categorized into basic, common and core competencies.

### BASIC COMPETENCIES

**UNIT OF COMPETENCY :** PARTICIPATE IN WORKPLACE COMMUNICATION

**UNIT CODE :** 500311105

**UNIT DESCRIPTOR :** This unit covers the knowledge, skills and attitudes required to gather, interpret and convey information in response to workplace requirements.

ELEMENT	PERFORMANCE CRITERIA <i>Italicized</i> terms are elaborated in the Range of Variables	REQUIRED KNOWLEDGE	REQUIRED SKILLS
1. Obtain and convey workplace information	1.1 Specific and relevant information is accessed from <b><i>appropriate sources</i></b> 1.2 Effective questioning, active listening and speaking skills are used to gather and convey information 1.3 Appropriate <b><i>medium</i></b> is used to transfer information and ideas 1.4 Appropriate non-verbal communication is used 1.5 Appropriate lines of communication with supervisors and colleagues are identified and followed 1.6 Defined workplace procedures for the location and <b><i>storage</i></b> of information are used 1.7 Personal interaction is carried out clearly and concisely	<ul style="list-style-type: none"> <li>• Effective communication</li> <li>• Different modes of communication</li> <li>• Written communication</li> <li>• Organizational policies</li> <li>• Sources of information</li> <li>• Types of question</li> <li>• Medium of communication</li> <li>• Flow of communication</li> <li>• Storage system</li> <li>• Telephone courtesy</li> </ul>	<ul style="list-style-type: none"> <li>• Follow simple spoken language</li> <li>• Performing routine workplace duties following simple written notices</li> <li>• Ability to relate to people of social range in the workplace</li> <li>• Gather and provide information in response to workplace requirements</li> <li>• Listening skills</li> <li>• Questioning skills</li> <li>• Workplace language skills</li> </ul>
2. Participate in workplace meetings and discussions	2.1 Team meetings are attended on time 2.2 Own opinions are clearly expressed and those of others are listened to without interruption 2.3 Meeting inputs are consistent with the meeting purpose and established <b><i>protocols</i></b> 2.4 <b><i>Workplace interactions</i></b> are conducted in a courteous manner	<ul style="list-style-type: none"> <li>• Communication procedures and systems</li> <li>• Meeting protocols</li> <li>• Nature of workplace meetings</li> <li>• Barriers of communication</li> <li>• Workplace interactions</li> <li>• Non-verbal communication</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to relate to people of social range in the workplace</li> <li>• Interpersonal communication skill</li> <li>• Observing meeting protocols</li> </ul>

ELEMENT	PERFORMANCE CRITERIA <i>Italicized</i> terms are elaborated in the Range of Variables	REQUIRED KNOWLEDGE	REQUIRED SKILLS
	2.5 Questions about simple routine workplace procedures and matters concerning working conditions of employment are asked and responded to 2.6 Meetings outcomes are interpreted and implemented		
3. Complete relevant work related documents	3.1 Range of <b>forms</b> relating to conditions of employment are completed accurately and legibly 3.2 Workplace data is recorded on standard workplace forms and documents 3.3 Basic mathematical processes are used for routine calculations 3.4 Errors in recording information on forms/ documents are identified and properly acted upon 3.5 Reporting requirements to supervisor are completed according to organizational guidelines	<ul style="list-style-type: none"> <li>• Technology relevant to the enterprise and the individual's work</li> <li>• Types of workplace documents and forms</li> <li>• Basic mathematical concepts</li> <li>• Kinds of workplace report</li> </ul>	<ul style="list-style-type: none"> <li>• Apply basic mathematical processes of addition, subtraction, division and multiplication</li> <li>• Data recording</li> <li>• Report writing</li> </ul>

**RANGE OF VARIABLES**

<b>VARIABLE</b>	<b>RANGE</b>
1. Appropriate sources	1.1. Team members 1.2. Suppliers 1.3. Trade personnel 1.4. Local government 1.5. Industry bodies
2. Medium	2.1. Memorandum 2.2. Circular 2.3. Notice 2.4. Information discussion 2.5. Follow-up or verbal instructions 2.6. Face to face communication
3. Storage	3.1. Manual filing system 3.2. Computer-based filing system
4. Forms	4.1. Personnel forms, telephone message forms, safety reports
5. Workplace interactions	5.1. Face to face 5.2. Telephone 5.3. Electronic and two way radio 5.4. Written including electronic, memos, instruction and forms, non-verbal including gestures, signals, signs and diagrams
6. Protocols	6.1. Observing meeting 6.2. Compliance with meeting decisions 6.3. Obeying meeting instructions

**EVIDENCE GUIDE**

1. Critical Aspects of Competency	Assessment requires evidence that the candidate: 1.1. Prepared written communication following standard format of the organization 1.2. Accessed information using communication equipment 1.3. Made use of relevant terms as an aid to transfer information effectively 1.4. Conveyed information effectively adopting the formal or informal communication
2. Resource Implications	2.1. Fax machine 2.2. Telephone 2.3. Writing materials 2.4. Internet
3. Methods of Assessment	3.1. Direct Observation 3.2. Oral interview and written test
4. Context of Assessment	Competency may be assessed individually in the actual workplace or through accredited institution

**UNIT OF COMPETENCY: WORK IN TEAM ENVIRONMENT****UNIT CODE : 500311106****UNIT DESCRIPTOR :** This unit covers the skills, knowledge and attitudes to identify role and responsibility as a member of a team.

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b> <i>Italicized</i> terms are elaborated in the Range of Variables	<b>REQUIRED KNOWLEDGE</b>	<b>REQUIRED SKILLS</b>

## CORE COMPETENCIES

**UNIT OF COMPETENCY: PERFORM ROUGHING-IN ACTIVITIES, WIRING AND CABLING WORKS FOR SINGLE-PHASE DISTRIBUTION, POWER, LIGHTING AND AUXILIARY SYSTEMS**

**UNIT CODE : ELC741301**

**UNIT DESCRIPTOR :** This unit covers the knowledge, skills and attitudes on *installing* electrical metallic and non-metallic conduit, wire ways and cable clamp, auxiliary terminal cabinet and distribution frame panel board/safety switch and used in roughing-in based on the required performance standards.

This unit also covers the outcomes required in preparing for cable pulling and installation, performing wiring and cabling lay-out and notifying completion of work for single-phase distribution, power, lighting and auxiliary systems.

ELEMENT	PERFORMANCE CRITERIA <i>Italicized</i> terms are elaborated in the Range of Variables	REQUIRED KNOWLEDGE	REQUIRED SKILLS
1. Install electrical metallic /non-metallic (PVC conduit)	1.1 Correct drawings are interpreted based on job requirements 1.2 Correct quantities of <b>conduit, fittings</b> and <b>accessories</b> are determined as per job requirements 1.3 <b>Tools and equipment</b> are selected as per job requirements 1.4 Conduit is assembled ensuring that fittings are fully inserted and tightened as per job requirements 1.5 Conduit is bent with bends not exceeding 90° as per job requirements 1.6 Conduit couplings and elbows are installed as per job requirements 1.7 Conduit is threaded in line with job requirements 1.8 Safety procedures are followed in line with standard operating procedures (SOPs)	<ul style="list-style-type: none"> <li>• Interpretation of               <ul style="list-style-type: none"> <li>○ electrical wiring diagrams</li> <li>○ mechanical drawings</li> </ul> </li> <li>• Types of electrical conduits</li> <li>• Proper uses and installation of conduits</li> <li>• Technics in installing and bending of conduits and fittings</li> <li>• Proper Installation for maintenance accessibility</li> <li>• Safe use of adhesives</li> <li>• Proper use of safety harness (PPE)</li> </ul>	<ul style="list-style-type: none"> <li>• Reading skills required to interpret work instructions</li> <li>• Handling of materials and tools and equipment</li> <li>• Lay-outting conduits</li> <li>• Bending electrical metallic conduits</li> <li>• Cutting conduits</li> <li>• Performing the installation economically</li> </ul>

**EVIDENCE GUIDE**

1. Critical aspects of competency	Assessment requires evidence that the candidate: 1.1 Installed electrical metallic /non- metallic (PVC conduit) 1.2 Installed wire ways and cable tray 1.3 Installed auxiliary terminal cabinet and distribution panel 1.4 Prepared for cable pulling and installation 1.5 Performed wiring and cabling lay out 1.6 Notified completion of work
2. Resource Implications	The following resources <b>MUST</b> be provided: 2.1 Workplace location 2.2 Tools and equipment appropriate to roughing-in, wiring and cabling works and installation processes 2.3 Materials relevant to the proposed activity 2.4 Drawings and specifications relevant to the task
3. Methods of Assessment	Competency must be assessed through: 3.1 Direct observation of application to tasks. 3.2 Questions related to underpinning knowledge 3.3 Demonstration 3.4 Written test
4. Context for Assessment	4.1 Competency may be assessed in the workplace or in a simulated workplace setting 4.2 Assessment shall be done while the tasks are being undertaken either individually or as part of a team under limited supervision

## SECTION 3 TRAINING ARRANGEMENTS

These standard arrangement are developed to give technical and vocational education and training (TVET) provides information and guidance on important requirements needed when designing training programs for Electrical Installation and Maintenance NC II.

These include information on curriculum design, training delivery, trainee entry requirements, tools and equipment, training facilities and trainer's qualification.

### 3.1 CURRICULUM DESIGN

TESDA shall provide the training on the development of competency-based curricula to training providers. This will equip them with needed knowledge and skills in developing their own curricula based on the components mentioned below.

Delivery of knowledge requirements for the basic, common and core units of competency specifically in the areas of mathematics, science/technology, communication/language and other academic subjects shall be contextualized. To this end, TVET providers shall develop a Contextual Learning Matrix (CLM) to accompany their curricula.

**Course Title: Electrical Installation and Maintenance NC Level: NC II**

**Nominal Training Hours:**

**18 Hours (Basic competencies)**

**24 Hours (Common competencies)**

**154 Hours (Core competencies)**

**Total: 196 Hours**

#### **Course Description:**

This course is designed to equip individuals with operational skills in Electrical Installation & Maintenance NC level II particularly in installing and maintaining electrical wiring, lighting and related equipment/systems in residential houses/buildings where the voltage does **not exceed 600 volts**.

To complete the course, all units prescribed for this qualification must be achieved:

### 3.2 TRAINING DELIVERY

1. The delivery of training shall adhere to the design of the curriculum and guided by the principles of competency-based TVET.
  - a. Course design is based on competency standards set by the industry or recognized industry sector; (Learning system is driven by competencies written to industry standards)
  - b. Training delivery is learner-centered and should accommodate individualized and self-paced learning strategies;
  - c. Training can be done on an actual workplace setting, simulation of a workplace and/or through adoption of modern technology.
  - d. Assessment is based in the collection of evidence of the performance of work to the industry required standards;
  - e. Assessment of competency takes the trainee's knowledge and attitude into account but requires evidence of actual performance of the competency as the primary source of evidence.
  - f. Training program allows for recognition of prior learning (RPL) or current competencies;
  - g. Training completion is based on satisfactory performance of all specified competencies.
  
2. The competency-based TVET system recognizes various types of delivery modes, both on-and off-the-job as long as learning is guided by the competency standards specified by the industry. The following training modalities and its variations/components may be adopted singly or in combination with other modalities when designing and delivering training programs:

#### 2.1 Institution- Based:

- **Dual Training System (DTS)/Dualized Training Program (DTP)** which contain both in-school and in-industry training or fieldwork components. Details can be referred to the Implementing Rules and Regulations of the DTS Law and the TESDA Guidelines on the DTP;
  
- **Distance learning** is a formal education process in which majority of the instruction occurs when the students and instructor are not in the same place. Distance learning may employ correspondence study, audio, video, computer technologies or other modern technology that can be used to facilitate learning and formal and non-formal training. Specific guidelines on this mode shall be issued by the TESDA Secretariat.
  
- The **traditional classroom-based** or **in-center instruction** may be enhanced through use of learner-centered methods as well as laboratory or field-work components.

## 2.2 Enterprise-Based:

- **Formal Apprenticeship** – Training within employment involving a contract between an apprentice and an enterprise on an approved apprenticeable occupation.
- **Enterprise-based Training**- where training is implemented within the company in accordance with the requirements of the specific company. Specific guidelines on this mode shall be issued by the TESDA Secretariat.

## 2.3 Community-Based:

- **Community-Based** – short term programs conducted by non-government organizations (NGOs), LGUs, training centers and other TVET providers which are intended to address the specific needs of a community. Such programs can be conducted in informal settings such as barangay hall, basketball courts, etc. These programs can also be mobile training program (MTP).

## 3.3 TRAINEE ENTRY REQUIREMENTS

This section specifies the qualifications of trainees including their education/experience. To qualify as trainee for Electrical Installation & Maintenance NC II, a candidate:

- must have completed at least 10 yrs. basic education or an ALS certificate of achievement with grade 10 equivalent holder
- must be able to communicate both orally and in writing
- must be able to perform basic mathematical computation

The list does not include specific institutional requirements such as educational attainment, appropriate work experience, and others that may be required of the trainees by the school or training center delivering the TVET program.

### 3.4 LIST OF TOOLS, EQUIPMENT AND MATERIALS ELECTRICAL INSTALLATION & MAINTENANCE NC II

Recommended list of tools, equipment and materials for the training of 25 trainees for Electrical Installation & Maintenance NC II.

TOOLS		EQUIPMENT		MATERIALS	
QTY	ITEM	QTY	ITEM	QTY	ITEM
5 pcs.	Spirit level	5 units	Electric drill	25 pcs.	RSC/IMC

### 3.5 TRAINING FACILITIES ELECTRICAL INSTALLATION & MAINTENANCE NC II

Based on a class intake of 25 students/trainees, below are the space requirement & their sizes:

TEACHING/LEARNING AREAS	SIZE IN METERS	AREA IN SQ. METERS	QTY	TOTAL AREA IN SQ. METERS
Lecture Area	5 x 8	40	1	40
Laboratory Area	5 x 8	40	1	40
Learning Resource Area	4 x 5	20	1	20
Tool Room / Storage Area	4 x 5	20	1	20
Wash ,Toilet & Locker Room	1 x 2	2	2	4
<b>Total</b>				124
Facilities / Equipment / Circulation**				38
<b>Total Area</b>				<b>162</b>

**\*\* Area requirement is equivalent to 30% of the total teaching/learning areas**

### **3.6 TRAINER'S QUALIFICATIONS**

To qualify as trainer for Electrical Installation & Maintenance NC II level, a person must:

- be a holder of NTTC I in Electrical Installation & Maintenance NC II (or higher)
- have at least 2-years relevant industry experience and/or teaching experience

### **3.7 INSTITUTIONAL ASSESSMENT**

Institutional assessment is undertaken by trainees to determine their achievement of units of competency. A certificate of achievement is issued for each unit of competency.

The result of the institutional assessment may be considered as evidence for the assessment for national certification. As a matter of policy, graduates of programs registered with TESDA under this training regulation are required to undergo mandatory national competency assessment upon completion of the program.

## **SECTION 4. ASSESSMENT AND CERTIFICATION ARRANGEMENT**

*Competency Assessment* is the process of collecting evidence and making judgments whether competency has been achieved. The purpose of assessment is to confirm that an individual can perform to the standards expected at the workplace as expressed in relevant competency standards.

The assessment process is based on evidence or information gathered to prove achievement of competencies. The process may be applied to an employable unit(s) of competency in partial fulfillment of the requirements of the national qualification.

### **4.1. NATIONAL ASSESSMENT AND CERTIFICATION ARRANGEMENTS**

- 4.1.1. To attain the National Qualification of *Electrical Installation & Maintenance NC II*, the candidate must demonstrate competence in all the units listed in Section 1. Successful candidates shall be awarded a National Certificate II signed by the TESDA Director General.
- 4.1.2. The qualification of Electrical Installation & Maintenance NC II can be attained through demonstration of competence through project-type assessment covering all the required units of the qualification.
- 4.1.3. Assessment shall focus on the core units of competency. The basic and common units shall be integrated or assessed concurrently with the core units.
- 4.1.4. The following are qualified to apply for assessment and certification:
  - Graduate of formal, non-formal and informal including enterprise-based education/training programs/courses.
  - Experienced workers (wage employed or self-employed)
- 4.1.5. For those holders of existing National Certificate (NC) of individuals in Electrical Installation and Maintenance NC II, automatic conversion will be implemented.
- 4.1.6. Clustering of competencies is not applicable.
- 4.1.7. Individuals who already possess Certificate of Competency (COC) in Electrical Installation & Maintenance NC II are advised to take the assessment for this amended TR on or before the expiration of their COCs.
- 4.1.8. The guidelines on assessment and certification are discussed in detail in the “Procedures Manual on Assessment and Certification” and “Guidelines on the Implementation of the Philippine TVET Competency Assessment and Certification System (PTCACS)”.

## 4.2. COMPETENCY ASSESSMENT REQUISITE

4.2.1 *Self-Assessment Guide*. The self-assessment guide (SAG) is accomplished by the candidate prior to actual competency assessment. SAG is a pre-assessment tool to help the candidate and the assessor determine what evidence is available, where gaps exist, including readiness for assessment.

This document can:

- a. Identify the candidate's skills and knowledge
- b. Highlight gaps in candidate's skills and knowledge
- c. Provide critical guidance to the assessor and candidate on the evidence that need to be presented
- d. Assist the candidate to identify key areas in which practice is needed or additional information or skills that should be gained prior`

4.2.2 *Accredited Assessment Center*. Only Assessment Center accredited by TESDA is authorized to conduct competency assessment. Assessment centers undergo a quality assured procedure for accreditation before they are authorized by TESDA to manage the assessment for National Certification.

4.2.3 *Accredited Competency Assessor*. Only accredited competency assessor is authorized to conduct assessment of competence. Competency assessors undergo a quality assured system of accreditation procedure before they are authorized by TESDA to assess the competencies of candidates for National Certification.

## ELECTRICAL INSTALLATION & MAINTENANCE NC II COMPETENCY MAP

### BASIC COMPETENCIES

Receive and Respond to Workplace Communication	Work with Others	Demonstrate work values	Practice basic housekeeping procedures	<b>Participate in Workplace Communication</b>	<b>Work in a Team Environment</b>	<b>Practice career professionalism</b>
<b>Practice occupational health and safety procedures</b>	Lead Workplace Communication	Lead Small Working Teams	Develop and Practice Negotiating Skills With Team Members	Guide Effective Solutions to Problems Arising from Work Activities	Check and Develop the Use of Mathematical Concepts & Techniques	Use Relevant Technologies Applicable to Assigned Work
Lead in Utilizing Specialized Communication Skills	Assist in Developing Team and Individuals	Apply Problem Solving Techniques in the Workplace	Collect, analyze and organize information	Plan and Organize Work for Several Working Teams	Promote Environmental Protection	

### COMMON COMPETENCIES

<b>Use Hand Tools</b>	<b>Perform Mensuration and Calculation</b>	<b>Prepare and Interpret Technical Drawing</b>	<b>Apply Quality Standards</b>	<b>Perform Computer Operations</b>
<b>Terminate and Connect Electrical Wiring and Electronic Circuits</b>	<b>Observe Procedures, Specifications and Manuals of Instructions</b>	<b>Maintain Tools and Equipment</b>	<b>Test Electronic Components</b>	

### CORE COMPETENCIES

Prepare electrical materials and tools	Perform roughing-in activities for basic electrical lay-out	Perform installation of wiring devices for power, lights & auxiliary outlets	Perform installation of wiring devices	Perform installation of lighting fixtures	Perform installation of basic electrical protection systems	Perform installation of basic auxiliary outlets and lighting fixtures	Perform commissioning on low voltage electrical systems
<b>Perform roughing-in activities wiring and cabling works for single-phase distribution system, power, lighting and auxiliary.</b>		<b>Install electrical protective devices for distribution of power, lighting, auxiliary and to include lightning protection and grounding systems</b>		<b>Install wiring devices of floor and wall mounted outlets, lighting fixtures/switches and auxiliary outlet.</b>			

## GLOSSARY OF TERMS

### GENERAL

- 1) **Certification** - is the process of verifying and validating the competencies of a person through assessment
- 2) **Certificate of Competency (COC)** – is a certification issued to individuals who pass the assessment for a single unit or cluster of units of competency
- 3) **Common Competencies** - are the skills and knowledge needed by all people working in a particular industry
- 4) **Competency** - is the possession and application of knowledge, skills and attitudes to perform work activities to the standard expected in the workplace
- 5) **Competency Assessment** - is the process of collecting evidence and making judgments on whether competency has been achieved
- 6) **Competency Standard (CS)** - is the industry-determined specification of competencies required for effective work performance
- 7) **Context of Assessment** - refers to the place where assessment is to be conducted or carried out
- 8) **Core Competencies** - are the specific skills and knowledge needed in a particular area of work - industry sector/occupation/job role
- 9) **Critical aspects of competency** - refers to the evidence that is essential for successful performance of the unit of competency
- 10) **Elective Competencies** - are the additional skills and knowledge required by the individual or enterprise for work
- 11) **Elements** - are the building blocks of a unit of competency. They describe in outcome terms the functions that a person performs in the workplace.
- 12) **Evidence Guide** - is a component of the unit of competency that defines or identifies the evidences required to determine the competence of the individual. It provides information on critical aspects of competency, underpinning knowledge, underpinning skills, resource implications, assessment method and context of assessment
- 13) **Level** - refers to the category of skills and knowledge required to do a job
- 14) **Method of Assessment** - refers to the ways of collecting evidence and when, evidence should be collected
- 15) **National Certificate (NC)** – is a certification issued to individuals who achieve all the required units of competency for a national qualification defined under the Training Regulations. NCs are aligned to specific levels within the PTQF
- 16) **Performance Criteria** - are evaluative statements that specify what is to be assessed and the required level of performance

- 17) **Qualification** - is a cluster of units of competencies that meets job roles and is significant in the workplace. It is also a certification awarded to a person on successful completion of a course in recognition of having demonstrated competencies in an industry sector
- 18) **Range of Variables** - describes the circumstances or context in which the work is to be performed
- 19) **Recognition of Prior Learning (RPL)** – is the acknowledgement of an individual's skills, knowledge and attitudes gained from life and work experiences outside registered training programs
- 19) **Resource Implication** - refer to the resources needed for the successful performance of the work activity described in the unit of competency. It includes work environment and conditions, materials, tools and equipment
- 20) **Basic Competencies** - are the skills and knowledge that everyone needs for work
- 21) **Training Regulations (TR)** – refers to the document promulgated and issued by TESDA consisting of competency standards, national qualifications and training guidelines for specific sectors/occupations. The TR serves as basis for establishment of qualification and certification under the PTQF. It also serves as guide for development of competency-based curricula and instructional materials including registration of TVET programs offered by TVET providers
- 22) **Underpinning Knowledge** - refers to the competency that involves in applying knowledge to perform work activities. It includes specific knowledge that is essential to the performance of the competency
- 23) **Underpinning Skills** - refers to the list of the skills needed to achieve the elements and performance criteria in the unit of competency. It includes generic and industry specific skills
- 24) **Unit of Competency** – is a component of the competency standards stating a specific key function or role in a particular job or occupation; it is the smallest component of achievement that can be assessed and certified under the PTQF

## SECTOR SPECIFIC

- 1) **Technical Terms.** All technical terms are used with meanings as defined in the latest published edition of the Philippine Electrical Code, in applicable laws, such as R.A. 7920 (The New Electrical Engineering Law), and current electrical engineering practice.
- 2) **Other Terms.** All other terms are used as defined in applicable TESDA documents.

## ACKNOWLEDGEMENTS

The Technical Education and Skills Development Authority (TESDA) wishes to extend thanks and appreciation to the many representatives of business, industry, academe and government agencies who donated their time and expertise to the development and validation of these Training Regulations.
