A Preliminary Study on the Pay Scales in TVET-Related Qualifications

A Preliminary Study on the Pay Scales in TVET-Related Qualifications

I. Introduction (Background of the Study)

The United Nations' Post-2015 Agenda emphasizes the need to provide access to quality education in order to be successful in the job market, achieve inclusive growth and reduce poverty. According to the World Bank, workers who are less educated and unskilled are more likely to experience unemployment, or work in unstable low-wage jobs that offer little career mobility or growth. One of the ways to address these problems is to upgrade the skills of workers. Several literature reports that there is a positive relationship between higher levels of education and earnings. Thus, improvement in education should target the acquisition of the necessary skills in order to enter the formal wage and salaried employment sector, that will ultimately result to reduction of unemployment, increase in incomes, and improvement in standards of living of people.

One of the objectives for the institutionalization of the Philippine Qualifications Framework (PQF) is to establish national standards and levels of qualifications to assist and support academic and worker mobility and to address jobskills mismatch. The PQF ensures quality in our education and training systems, make qualifications earned in the Philippines gain international recognition, thereby making Filipinos able to continue their education, or be employed, outside the country. The PQF incorporates an eight-level qualifications descriptors defined in terms of knowledge, skills and values, application, and degree of independence and sets the standards for qualification outcomes.

Republic Act 10969 stipulates a provision, specifically Section 7, that "industry sector representatives shall be consulted and tapped in the development and implementation of the PQF to ensure the alignment of educational outcomes with industry requirements and add to the value of qualifications within the workplace. To operationalize the provisions of the law, the PQF National Coordinating Committee

should ensure that the mechanisms are put in place in order to establish the differentiation of pay scales across levels of qualifications in consultation with concerned sectors. Across several pay scale systems, one of the factors that determines how much an employee is to be paid as a wage or salary is the education level.

II. Objective

Generally, the study intends to gather, review and analyze the existing data and information available on pay scales, as well as the various methods of obtaining pay scales across different studies.

Specifically it aims to:

- Determine how pay scale structures are differentiated across education or skills attainment, especially for occupations that require technicalvocational education and training (TVET); and
- 2. Provide inputs/recommendations that can be used as reference in the conduct of the full-blown/comprehensive study on Payscale for PQF Levels I-V.

III. Significance of the Study

The significance of this research lies in the fact that it is the precursor on the establishment of a pay scale system among TVET related employment in the Philippines. As a country, the Philippines have a problem with job mismatch. Previously, the ten-year basic education system was geared to preparing students to enter into tertiary schools but now, the K to 12 system caters to the technical vocational and livelihood (TVL) track with its skills-ready and employable graduates. Thus, the standard pay scale system can encourage more students to pursue Technical and Vocational courses and life-long learning because it is a good alternative for those who cannot afford college education and yet desire qualification

for better employment opportunities. The promulgation of the PQF allows the Philippine educational system to be at par with those implemented internationally by other countries. In line with this, establishing the Peso Value of the qualification necessitates the creation of a pay structure that can estimate the value of a qualification thus encouraging Filipinos to pursue lifelong learning that will result to better income and improved standard of living.

This study is also meant to gather preliminary information on the pay scale across levels of qualifications, as well as corresponding recommendations to aid in the conduct of a more comprehensive pay scale study in the Philippines, including the selection of the focus industry/sector for the study.

IV. Scope and Limitations

The study will utilize secondary sources from data obtained by government agencies such as the Philippine Statistics Authority. It will also make use of researches/studies on pay scale systems implemented by other countries.

V. Review of Related Literature

a. Pay Scale Description

According to Payscale, Inc., a firm based in the United States, a pay scale or pay structure enables the following:

- Clarify the market and internal value for each job, and provides a way to manage employee pay effectively
- Quantify compensation costs & enables budget decisions.
- Validates compensation strategy & aligns to business goals.
- Provides a tool to talk with employees about development.
- Ensures pay equity.
- Determines pay for non-benchmark jobs.
- Allows ease of administration.

Moreover, a pay structure includes a pay schedule that includes sets of Pay Grades that are grouped under multiple markets (geography, industry, etc). The Pay Grades are labels for groups of jobs with similar relative internal worth. Each Pay Grade is associated with a pay range, which denotes the upper and lower bounds of compensation.

Further, there are no fixed rules for every organization in determining the pay grades. An organization are free to decide how many grades to have. The number of pay grades may vary depending on

- the size of the organization
- the vertical distance between the highest and lowest level job
- how finely the organization defines jobs and differentiates between them (i.e. levels)
- the pay increase and promotion policy of the organization.

Payscale, Inc. also recommends additional considerations in determining the pay scale:

- Difference at the base vs top of structure.
 - o Bigger range spread at the top, narrower at the base.
 - o Time to proficiency.
 - o Differentiation of skill sets.
 - Manager input.
- Overlap between pay ranges.
 - Long tenure/high performing employees can earn higher wages.
 - o Provides more cost effective career progression within the org.

b. Methodology

Payscale, Inc. tracks how much full-time employees earn over time in terms of total cash compensation in the US, on a quarterly basis. The full-time employees as defined by the firm are those who work for an employer on an hourly or salaried basis. Total cash compensation is defined as all cash payments earned by an

employee during a year of full-time employment. It also defines total cash compensation to include base salary or hourly wages, overtime wages, bonuses, commissions, tips, and profit sharing, but excludes retirement plan contributions from employers, health insurance, company car privileges, travel allowances, or other non-cash benefits. It also does not include equity (stock) compensation.

Payscale, Inc. only tracks actual wages and does not adjust the amounts for inflation. The pay scale index generated by the firm includes a national one, as well as separate indices for specific industries, metropolitan areas, job categories and company sizes. The index also measures the change over time in what an employer must pay to fill a specific job with a worker who has certain skills, abilities, education, experience and other compensable factors. The PayScale Index uses data on all types of full-time employees working in a given time period. The firm performs a detailed analysis of how various compensable factors, like work experience, education, employment setting and job responsibilities, affect pay. It has extensive data of over 35 million employee profiles, accounting for 250 compensable factors for over 12,000 unique job titles, which show how the pay of actual workers varies with each of these factors.

c. Case Studies

Below is the information on the pay structure for apprenticeships. As early as 1960's, there are countries with established pay structure for those taking apprenticeship (youth wages).¹

Country	Pay Structure for Apprentices
Belgium	Wages of those under 21 years old are in reference to their collective Bargaining agreement. There is a 60% reduction from adult workers rate for those 16 years old and 5% reduction for those six months away from their 21 st birthday. However, individuals with vocational school diploma can

¹ Bureau of Labor Statistics. "On-the-Job Training and Wage-hour standards in Foreign Countries." United States Department of Labor 1967.

Country	Pay Structure for Apprentices			
	receive a fixed increase.			
France	Allots pocket money with no legal compensation but collective bargaining agreements gives fifty percent of the minimum wage with increasing progressive scale.			
Australia	Industrial Conciliation and Arbitration Commission regulates the salary according to the years of apprenticeship and percentage of regular wage: year 1 (31.5%), year 2 (40.5%) year 3 (47.25%), year 4 (71%), year (85.5%)			
Brazil	Apprenticeship wage is fifty percent of the workers wage.			
Columbia	Apprenticeship wage begins with half of the legal minimum wage with wage increase for every 6 months (until the wage reaches the legal minimum).			
West Germany	Industry wide collective agreement regulates the wages. Apprentice wages are considered educational grant which begins with ¼ of unskilled workers' salary that gradually increases for each year.			
Japan	Apprenticeship salary are according to the pay structure of the organization and given a bonus.			
Italy and UK	Wage were set through collective bargaining			
Venezuela	Training programs apprentice receives half of the regular qualified workers pay.			
Germany	Apprentice may work for a year or two before receiving a salary equals to a journeyman's rate.			
Netherlands	Apprentice are given a improver's salary for several years before qualifying for full wage and skilled status.			

VI. Results and Discussion

a. Salary by Country and Skill Level

WageIndicator Foundation reports the following wages by country and by skill level:

Table 1: Monthly Real Wage of Selected Countries by Skill Level

	Statutory	Monthly Real Wage by Skill Level ³ (in USD)				
Country	Minimum	Low Skilled	Medium-Skilled	High-Skilled		
	Wage ²	Employee	Employee	Employee		
Indonesia	100	163-235	202-269	237-344		
Cambodia	169	40-129	220-309	348-499		
Vietnam	119	211-231	236-313	329-466		
India	58	108-151	184-286	372-600		
Russian	142	215-298	337-498	490-723		
Federation	142	215-296	337-496	490-723		
US	1,257	1,552-1,957	1,755-2,561	3,160-4,515		

Source: https://wageindicator.org/salary/wages-in-context

Based on the monthly real wage data of selected countries, the addition of skills can result to increase in wages. A low skilled employee in the US can earn 23% above the statutory minimum wage in the country, while a high skilled employee in India can earn as high as 934% of its statutory minimum wage. Medium-skilled employees can increase their salary from 40% of statutory minimum wage in the US, and 393% in India.

²WageIndicator.org defines that the statutory or legal minimum wages are set by governments, sometimes after consultation with the social partners. A number of countries has one minimum wage; in most cases that applies to the entire workforce. Other countries, however, apply multiple minimum wages for particular categories of workers defined by industry, firm size, occupational group, skill level, educational level, geographical characteristics, age, or years of service. In most countries the level(s) of the national minimum wage(s) are considerably above the level of the National Poverty Line.

³According to Wageindicator.org, the definition of groups follows the one-digit ISCO-classification of occupations where ISCO 1-2 are clustered into high-skilled, ISCO 3-5,7,8 into medium-skilled and ISCO 6, 9 into low-skilled groups.

Workers in activities of Households as Employers; Undifferentiated Goods-and-Services-Producing Activities of Households for Own Use has been consistent in receiving the lowest average daily basic pay. From 2013 to 2015, these workers receive an average daily basic pay of Php 124.00. Among the jobs that are under this industry classification are maids, cooks, waiters, valets, butlers, laundresses, gardeners, gatekeepers, stable lads, chauffeurs, caretakers, governesses, babysitters, tutors, secretaries, etc. The Activities of Extra-Territorial Organizations and Bodies has the highest average daily basic pay in 2013 and 2015, while Education has the highest average daily basic pay of more than Php 700.00.

The following industries have a daily basic pay that is higher than the average daily basic pay for all industries (arranged from highest to lowest):

- 1. Activities of Extra-Territorial Organizations and Bodies
- 2. Education
- 3. Professional, Scientific and Technical Activities
- 4. Electricity, Gas, Steam and Air Conditioning Supply
- 5. Financial and Insurance Activities
- 6. Information and Communications
- 7. Public Administration and Defense; Compulsory Social Security
- 8. Human Health and Social Work Activities
- 9. Administrative and Support Service Activities
- 10. Real Estate Activities
- 11. Water Supply; Sewerage, Waste Management and Remediation Activities
- 12. Arts, Entertainment and Recreation
- 13. Transportation and Storage

Meanwhile, below are the industries that have lower than the average basic pay (arranged from highest to lowest):

- 1. Manufacturing
- 2. Construction
- 3. Mining and Quarrying
- 4. Accommodation and Food Service Activities
- 5. Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles

- 6. Fishing and Aquaculture
- 7. Other Service Activities
- 8. Agriculture, Hunting and Forestry
- 9. Activities of Households as Employers; Undifferentiated Goods-and-Services-Producing Activities of Households for Own Use

Table 3: Average Daily Basic Pay of Wage and Salary Workers by Occupation, 2013-2015

	2013	2014	2015	Average 2013- 2015
ALL OCCUPATIONS	349.16	367.35	378.65	365.05

Assemblers	347.81	360.01	370.22	359.35
Laborers and Unskilled Workers	194.83	208.47	218.17	207.16
Special Occupations	762.16	843.76	823.80	809.91

Source: Occupational Wages Survey, Philippine Statistics Authority

Laborers and unskilled workers receive the lowest average daily basic pay, amounting only to an average of Php 207.16, while Officials of Government and Special-Interest Organizations, Corporate Executives, Managers, Managing-Proprietors and Supervisors receive the highest average daily basic pay, amounting to an average of Php 855.82, from 2013-2015.

Technical education is aimed at preparing technicians, para-professionals and other categories of middle-level workers. The occupations that require technical education and training can range from laborers up to technicians. The average daily basic pay of workers engaged in these occupations range from a low of Php 207.16 to Php 514.13.

Table 4: Median Monthly Basic Pay of Time-Rate Workers on Full-Time Basis by Major Industry Group, Philippines: 2014 and 2016

MAJOR/SELECTED INDUSTRY GROUP	MEDIAN M BASIC P	INCREASE/ DECREASE	
	2016	2014	DECREASE
ALL INDUSTRIES	12,013	11,756	2.19%
Agriculture, Forestry and Fishing	7,927	8,449	-6.18%
Mining and Quarrying	10,980	9,415	16.62%
Manufacturing	10,239	9,707	5.48%
Electricity, Gas, Steam and Air Conditioning Supply	20,400	17,961	13.58%
Water Supply; Sewerage, Waste Management and Remediation Activities	13,478	12,720	5.96%
Construction	11,612	11,486	1.10%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	11,396	11,288	0.96%
Transportation and Storage	12,665	12,479	1.49%
Accommodation and Food Service Activities	10,339	11,337	-8.80%
Information and Communications	21,399	22,262	-3.88%

Real Estate Activities	15,892	14,795	7.41%
Professional, Scientific and Technical Activities	19,576	17,612	11.15%
Administrative and Support Service Activities	13,210	12,384	6.67%
Education Except Public Education	13,967	12,766	9.41%
Human Health and Social Work Activities	11,434	10,856	5.32%
Arts, Entertainment and Recreation	11,434	10,735	6.51%
Repair of Computers and Personal and Household Goods; Other Personal Service Activities	12,173	11,748	3.62%

Source: Occupational Wages Survey, Philippine Statistics Authority

The following industries have a median monthly basic pay that is higher than the average monthly basic pay for all industries (arranged from highest to lowest):

- 1. Information and Communications
- 2. Electricity, Gas, Steam and Air Conditioning Supply
- 3. Professional, Scientific and Technical Activities
- 4. Financial and Insurance Activities
- 5. Real Estate Activities
- 6. Education Except Public Education
- 7. Water Supply; Sewerage, Waste Management and Remediation Activities
- 8. Administrative and Support Service Activities

- 9. Transportation and Storage
- 10. Repair of Computers and Personal and Household Goods; Other Personal Service Activities

Meanwhile, these are the industries that have lower than the average median monthly basic pay (arranged from highest to lowest):

- 1. Construction
- 2. Human Health and Social Work Activities
- 3. Arts, Entertainment and Recreation
- 4. Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles
- 5. Mining and Quarrying
- 6. Accommodation and Food Service Activities
- 7. Manufacturing
- 8. Agriculture, Forestry and Fishing

Workers in the Information and Communications industry has the highest median monthly basic pay at Php 22,262.00 in 2014 and Php 21,399.00 in 2016, while workers in the Agriculture, Forestry and Fishing industry has the lowest median monthly basic pay at Php 8,449.00 in 2014 and Php 7,927.00 in 2016.

While the median monthly basic pay increased for all industries, the median monthly basic pay decreased from 2014 to 2016 in the Accommodation and Food Service Activities, Agriculture, Forestry and Fishing, and Information and Communications industries. All other industries had an increase in median monthly basic pay, with the Mining and Quarrying industry has the largest increase at 16.62%.

c. Average Monthly Wage Rates of Time-Rate Workers on Full-Time Basis in Selected Industries and Occupations, Philippines: July 2016(In Establishments Employing 20 and More Workers. Wage rates refer to the sum of the basic pay and regular/guaranteed cash allowances.) vis-à-vis TESDA Training Regulations (TRs)

i. Mapping of Competencies

The TRs were matched according to each of the selected occupations in order to get an idea of the amount of monthly wage that will be received by a

person who gained competencies in a training for its corresponding occupation. After the matching, the competencies were grouped according to NC Level to determine the range of monthly wages are received per level.

Source: Occupational Wages Survey, Philippine Statistics Authority

Based on the July 2016 Occupational Wages Survey data for selected occupations that require TVET qualifications, those who engage in Woodworking-Machine Setters and Setter-Operation receive the lowest Average Monthly Wage Rateat Php 7,823.00, while the Computer Programmers receive the highest Average Monthly Wage Rate at Php 52,331.00.

It would also be worth noting that there are variations in the Average Monthly Wage Rate in some occupations across industries.

Table 6: Average Monthly Wage Rate Difference by Occupation, July 2016

Occupation	Average Monthly Wage Rate Difference
Accounting and Bookkeeping Clerks	15,858
Shop Salespersons and Demonstrators	1,898
Welders and Flamecutters	2,851
Plumbers, Pipe Fitters and Other Related Workers	3,080
Motor Vehicle Mechanics and Related Trades Workers	19,691
Heavy Truck and Lorry Drivers	1,757
Technical and Commercial Sales Representatives	5,585
Electrical Mechanics and Fitters	9,139
Bookkeepers	1,143
Electronics and Telecommunications Engineering Technicians	9,482
Computer Programmers	34,908
Ticket Clerks, Travel Agency Clerks and Related Workers	2,404
Customer Service Representatives/Associates (in call centers)	10,539

Computer Programmers have the highest variation, followed by Motor Vehicle Mechanics and Related Trades Workers, in Average Monthly Wage Rate between the lowest and the highest values. Computer Programmers receive the highest salary in Computer Programming, Consultancy and Related Activities; Information Service Activities, while they receive the lowest salary in Medical Transcription Activities. Motor Vehicle Mechanics and Related Trades Workers receive the lowest salary in Land Transport and Transport via Pipelines except Transport via Buses industry, while they receive the highest salary in the Manufacture of Motor Vehicles, Trailers and Semi-Trailers.

The complete list of Industries, Occupations covered in the July 2016 Occupational Wages Survey that indicate their Average Monthly Wage Rates, as well as their corresponding Training Regulations are indicated in Annex A. It would be worth to note that the following industries have almost all its occupations matched with corresponding TESDA Training Regulations: Travel Agency, Tour Operator, Reservation Service and Related Activities, Accommodation and Food Service Activities and Construction.

Table 7. Industry Activities vis-à-vis TESDA Training Regulations for Tourism Sector

VII. Conclusions and Recommendations

There are evidences in the abovementioned literature that there are differences in wage rates in relation to education, training and skills. Additional education, training and apprenticeships can contribute to increase in wages. Additional education and training can help in skills upgrading, and even so with increasing wage rates.

However, the Occupational Wages Survey also showed us that there are also differences in wage rates across industries. There are differences in the average daily and monthly wage rates across industries. Industries that have higher than average daily and monthly wage rates are the following sectors:

- 1. Professional, Scientific and Technical Activities
- 2. Electricity, Gas, Steam and Air Conditioning Supply
- 3. Information and Communications
- 4. Financial and Insurance Activities
- 5. Education
- 6. Water Supply; Sewerage, Waste Management and Remediation Activities
- 7. Administrative and Support Service Activities
- 8. Real Estate Activities
- 9. Transportation and Storage

Industries that have lower than the average daily and monthly wage rates are the following sectors:

- 1. Construction
- 2. Mining and Quarrying
- 3. Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles
- 4. Accommodation and Food Service Activities
- 5. Manufacturing
- 6. Agriculture, Forestry and Fishing

Occupations such as Computer Programmers, Motor Vehicle Mechanics and Related Trades Workers, Accounting and Bookkeeping Clerks, and Customer Service Representatives/Associates (in call centers) have the most differences in average wage rates across industries.

In the mapping of TESDA Training Regulations against industries and occupations, the Travel Agency, Tour Operator, Reservation Service and Related Activities, Accommodation and Food Service Activities and Construction industries have the most number of occupations with training regulations. Likewise, these are the sectors with the most number of registered programs and monitored enrolled and graduates.

Based on these results/findings, the following are recommended for the conduct of the comprehensive/full blown study on Payscale for PQF Levels I-V:

- 1. Best practices of different countries in setting the percentage for every additional certificate/s obtained by the workers can be consider in the formula that will be set for individuals that will acquire equivalent NC Level in the PQF Levels I-V. Among the countries, the practice of the United States of America, which is the 23% of the minimum statutory wage can be considered as applicable to the Philippine setting.
- 2. The comprehensive study on the pay scales is suggested to focus on the *Tourism and Construction sectors*, given the following considerations:
 - 2.1. These sectors have Training Regulations corresponding to NC Levels I-IV;
 - 2.2. Accounted with the most number of registered programs;
 - 2.3. Sectors with the most number of recorded enrolled and graduates; and
 - 2.4. Have the potential labor market opportunities given the current trends and priorities of the government.
